

MUHAMMAD AMMAR ALI

Lahore, Pakistan • muhammadammaralibhutta@gmail.com

Linkedin: [ammар-ali-ai](#) • Github: [ammарali-ai](#)

AI Engineer • AI Automation Engineer • ML Engineer

PROFESSIONAL SUMMARY

AI & Machine Learning Engineer with a BS in Artificial Intelligence and 2+ years of experience in machine learning, AI automation, and software development, specializing in building and deploying end-to-end ML pipelines and LLM-powered systems. Proficient in Python, TensorFlow, Scikit-learn, Hugging Face Transformers, and SQL, with hands-on experience in NLP, computer vision, prompt engineering, and RAG-based architectures. Designed and deployed production automation workflows using Claude API and n8n, integrating APIs, real-time monitoring, and data pipelines to drive AI-driven decision-making. Achieved up to 92% model accuracy on real-world classification tasks, with strong foundations in data structures, algorithms, RESTful APIs, and cloud-based deployment (Flask, FastAPI, Docker)

WORK EXPERIENCE

AI Automation Engineer | (CMIT Intern) Metaviz, Lahore

Jan 2026 – June 2026

- Designed AI-driven real-time monitoring and automation workflows using n8n and Claude API, enabling automated data collection, anomaly detection, and alert generation for operational oversight
- Built intelligent decision-support systems integrating LLM-based analysis with live data pipelines, providing automated risk summaries and actionable insights for management
- Engineered data processing pipelines integrating APIs and third-party services for continuous KPI monitoring and automated performance reporting across business units

IT Support & Systems Monitoring Officer | Mindbridge, Lahore

Oct 2024 – Jan 2026

- Monitored system performance and incident data across 900+ user accounts, producing regular status and compliance reports; analysed network metrics using PingPlotter, achieving 25–30% performance improvement
- Maintained security monitoring dashboards (Cisco AMP) tracking endpoint threat data and compliance metrics; managed telephony systems reducing disruptions by 20%

Data Science & Analytics Trainee | Knowledge Streams, Lahore

Jul 2024 – Sep 2024

- Conducted EDA on large datasets using Python (Pandas, NumPy), identifying trends to support strategic decision-making; applied ML algorithms (Scikit-learn) for classification and structured reporting
- Developed and deployed interactive Power BI dashboards for real-time KPI monitoring and performance visualisation, directly supporting management decision support

Python & Data Processing Intern | HiSkyTech, Remote

Jul 2024 – Aug 2024

- Automated data processing and validation pipelines using Pandas and NumPy, ensuring data integrity for reporting workflows; collaborated on software deployment and reliability improvement

EDUCATION

Bachelor of Science in Artificial Intelligence (BSAI)

Aug 2020 – Jul 2024

The Islamia University of Bahawalpur, Pakistan • CGPA: 3.16

TECHNICAL SKILLS

Programming: Python, C++, SQL, JavaScript (Basic)

ML & Deep Learning: TensorFlow, Keras, PyTorch, Scikit-Learn, CNNs, RNNs, LSTMs, Transformers, Transfer Learning, Feature Engineering, Hyperparameter Tuning

NLP, Gen AI & Computer Vision: Hugging Face Transformers, BERT, LangChain, LLMs, Prompt Engineering, RAG, NLTK, spaCy, OpenCV

Data Science & Analytics: Pandas, NumPy, EDA, Statistical Analysis, ETL Pipelines

Automation & Tools: n8n, Zapier, GHL, Claude API, Git, Jupyter Notebook, VS Code, Google Colab

Visualisation: Matplotlib, Seaborn, Plotly, Power BI

Deployment & Cloud: Flask, FastAPI, Docker, Google Cloud

Databases: MySQL, PostgreSQL, Supabase

Networking & IT Support: LAN/WAN, TCP/IP, DNS, DHCP, Windows/macOS/Linux Troubleshooting, Help Desk Operations

PROJECTS

Real-Time AI Monitoring & Alert System | *Metaviz, Lahore*

Apr 2026

- Built a production real-time monitoring and alert system using n8n automation with secure webhook integration, tracking live task events and automatically notifying teams — analogous to disaster early warning and alert dissemination systems
- Implemented data validation, error handling, and user-mapping to ensure uninterrupted monitoring data flow — critical reliability for emergency management platforms

Fake News Detection — NLP System | *Knowledge Streams, Lahore*

Jul – Oct 2024

- Developed a three-language (English, Urdu, Spanish) real-time text monitoring and classification system achieving 90% accuracy using BERT and SVM — applicable to monitoring disaster-related misinformation across Pakistan’s multilingual media landscape

Environmental Monitoring System — Rice Leaf Disease AI | *Final Year Project*

Jul 2024

- Developed an AI-powered image-based monitoring and classification system achieving 92% accuracy across a 10,000+ image dataset using CNN, SVM, Transfer Learning, and Random Forest — methodology directly transferable to satellite and drone image analysis for disaster damage assessment
- Comparative evaluation of four algorithms; Transfer Learning demonstrated strongest generalisation on domain-specific datasets — key insight for deploying AI monitoring in data-scarce disaster scenarios

Agricultural Risk Monitoring — Cotton Crop Disease Detection | *Semester Project*

Oct 2023

- CNN-based automated monitoring system achieving 89% accuracy across 5+ crop disease categories demonstrating AI-driven agricultural risk monitoring

CERTIFICATIONS

- **Python for Data Science & AI Development** — IBM (*Apr 2026*)
- **Machine Learning with Python** — IBM (*Apr 2026*)
- **Supervised Machine Learning: Regression** — IBM (*Apr 2026*)
- **Exploratory Data Analysis for Machine Learning** — IBM (*Apr 2026*)
- **Gen AI: Prompt Engineering Basics** — IBM (*Apr 2026*)
- **Python Essentials** — Cisco (*Oct 2024*)
- **Digital Forensics & Cybersecurity** — NAVTTC (*May 2024*)
- **Data Analytics & Business Intelligence** — Digiskills (*Oct 2023*)

CONFERENCES & EVENTS

- STEMS 2nd International Conference — The Islamia University of Bahawalpur (*Mar 2022*)
- ICMPAI & AI Expo 22 — The Islamia University of Bahawalpur (*Jun 2022*)
- AI Expo 23 — The Islamia University of Bahawalpur (*Jan 2023*)
